

CS ProFlex Jupiter

Sanding disc

:: CHARACTERISTIC

The Carsystem ProFlex Jupiter is a velcro soft film based sanding disc. Due to its extremely uniform and shallow scratch pattern the ProFlex Jupiter creates a perfect surface after sanding what largely reduces the polishing time.

:: APPLICATION

The Carsystem ProFlex Jupiter is used as the final sanding step before polishing.

:: PRODUCT DATA

Technical data

Dimensions: 152mm
Holes: 15 holes
Material: soft film
Grit material: corundum
Bonding: special treated corundum integrated in modified resin paper

:: HANDLING

The Carsystem ProFlex Jupiter can be processed by machine.
We recommend the following additional products:

- Processing by machine with an excenter machine 2.5mm / 3mm throw
- Processing by machine with the CS ProFlex Interface Pads 150mm 15-holes (soft 154.295, medium 154.193, hard 155.100)

:: SAFETY ISSUES

The before mentioned technical data and information, especially the recommendations for applying and using our products, are based on our current knowledge and experience when applied under normal conditions. In practice, the materials, surfaces or site conditions are so different that no warranty regarding the working results or liability, arising out of any relationship, can be inferred neither from this information nor from a verbal consultation, expect we are charged with intent or gross negligence. In this case the user is obliged to prove that he has informed us about all points required for a proper and promising judgement in writing, in time and completely. Patent rights of any third party are to be observed. Furthermore, our general sales and delivery terms and conditions and the latest Technical Data Sheet, which should be demanded, apply.

Directions for handling and waste disposal are in our Material Safety Data Sheet and the specifications of the Employers Liability Insurance Association for the chemical industry.
