

# SAFETY KNIFE

Art.-No.: 158.212

CAR  
SYSTEM®

## CONCEALED BLADE

This safety knife doesn't need a sharp tip to be a smart knife. The cutting head is flat and relatively small, the two noses on each side have the perfect length to protect, and both cutting edges are wide enough to safely and effortlessly cut 2-ply cardboard.

## 3IN1 BLADE HEAD

The safety knife fits like a glove. It's so comfortable to hold, that it feels like an extension of your hand. With it you can cut cardboard, split tape, open plastic strapping... you can even scrape residue off surfaces.

## ERGONOMICALLY SHAPED

Right handed? Left handed? It's really all the same. The safety knife fits perfectly in any hand. Gently arched outer edges, coupled with light ribbing and a low weight, ensure an ergonomic experience.

## CLEVER GUIDE SURFACES

Another reason why the safety knife can cut through cardboard so easily? The guide surfaces located right at the front of the safety knife help you to cut at an angle. Angled cutting means less material resistance!

## NO BLADE CHANGE

The Carsystem safety knife is a disposable knife. The blade can neither get lost nor injure you during blade change. When the time has come, you can easily dispose of the safety knife with your residual waste.

## CUTTING TECHNOLOGY

The Carsystem safety knife cuts almost everything you would normally cut with a knife. However, we recommend that you use your free hand to hold flexible materials, such as foil, in place. For cardboard boxes we recommend an angle of 45°.
